

**RESOLUTION NO. 2018-116**

**WHEREAS**, Somerset Development has requested the reduction of performance guarantees posted on property located on 145 Cliffwood Avenue, Block 155, Lot 1 on the Official Tax Map of the Township of Aberdeen; and

**WHEREAS**, the Township Engineer has performed an inspection of the improvements and has made a recommendation in a letter dated August 8, 2018 for the reduction of said bond reduction.

**NOW, THEREFORE, BE IT RESOLVED** by the Township Council of the Township of Aberdeen that the Performance Guarantees be reduced as follows – Schedule A - Bond #44BCSFA8317 in the amount of \$669,081.60 and Bond #44BCSFA8318 in the amount of \$1,620,000.00 will be reduced to \$686,724.48 and Cash Bond in the amount of \$254,342.40 be reduced to \$76,302.72. Schedule B – Bond # 44BCSFA8319 in the amount of \$1,258,790.18 be reduced to \$377,637.05 in accordance with the August 8, 2018 recommendation of the Township Engineer.

**BE IT FURTHER RESOLVED** that the reduction of the aforesaid bond is subject to the payment of any outstanding inspection and professional fees and concurrence by the Township Manager and Township Attorney.

All resolutions or part of resolutions inconsistent wherewith are hereby repealed.

This is living.

Re: Bond Reduction for Aberdeen Glassworks  
145 Cliffwood Ave  
Cliffwood, NJ 07721  
Block 155 Lot 1  
Application # 44BCSFA8317-Water main

July 30th, 2018

Ms. Ventura,

Somerset for Anchor Glass would like to put in request at this time for a reduction on our performance bond to 100% as allowed under the MLULs for the Aberdeen Glassworks at 145 Cliffwood Ave Cliffwood, NJ 07721. Block 155 Lot 1. Application #44BCSFA8317-Water main.

Sincerely,

A handwritten signature in black ink, appearing to read "Peter Tisdale".

**Re: Request for Performance Bond Reduction**  
**Somerset Anchor, LLC (The Glassworks)**  
**145 Cliffwood Avenue**  
**Block 155 Lot 1**  
**Application No.: SP 12-508**  
**Our File No.: PABP0155.02**

Dear Ms. Ventura:

Pursuant to a request from Somerset Anchor, LLC for a reduction of the performance guarantees posted for the work associated with the above referenced site, please be advised that we have made the necessary site evaluation and we are reporting herein.

#### **OFF-SITE IMPROVEMENTS**

The original off-site performance guarantees recommended by our office and posted by the developer were calculated as follows:

Total Performance Guarantee      \$ 2,543,424.00

|                  |                |
|------------------|----------------|
| 10% Cash Portion | \$ 254,342.40  |
| 90% Bond Portion | \$2,289,081.60 |

Accordingly, the total performance guarantee which should have been posted for the off-site improvements is \$2,543,424.00 of which ten percent (\$254,342.40) should have been submitted as a cash guarantee with the remainder (\$2,289,081.60) submitted as a performance bond.

It is our understanding that the performance guarantees posted for this site have not previously been reduced and still remain at 100% of the original amount.

Relative to our recent observation of the site and review of our files, the bulk of the off-site improvements have been completed; however, there are several items that are outstanding as indicated on the attached list. Accordingly, we recommend that the performance guarantees be reduced to 30% of the originally calculated performance guarantee to ensure final completion.

Ms. Karen Ventura  
Glassworks – Ph 1A,1B, 1C  
August 8, 2018  
Page 2

### OFF-SITE BOND RELEASE RECOMMENDATION

The estimated remaining off-site improvement cost for Somerset Anchor, LLC has been calculated at **\$654,504.00** based on the attached estimated remaining improvement cost breakdown.

Accordingly, rather than release the entire performance guarantee at this time, we recommend that the same be reduced to 30% of the original bond or **\$763,027.20** in accordance with the attached estimated remaining site improvement cost breakdown of which 10% (**\$76,302.72**) should be retained as a cash guarantee with the remainder (**\$686,724.48**) as a performance bond until such time that the remaining improvements at the site have been completed, subject to approval by the Township Attorney.

### ON-SITE IMPROVEMENTS

The original on-site performance guarantees recommended by our office and posted by the developer were calculated as follows:

|                             |                |
|-----------------------------|----------------|
| Total Performance Guarantee | \$8,391,934.50 |
| 10% Cash Portion            | \$ 839,193.45  |
| OR                          |                |
| 15% Bond Portion            | \$1,258,790.18 |

Accordingly, the total performance guarantee which should have been posted for the on-site improvements is \$839,193.45 as a cash guarantee OR 15% \$1,258,790.18 submitted as a performance bond.

It is our understanding that the performance guarantees posted for this site have not previously been reduced and still remains at 100% of the original amount.

Relative to our recent observation of the site and review of our files, a portion of the on-site improvements have been completed; however, there are several items that are outstanding as indicated on the attached list. Accordingly, we recommend that the performance guarantees be reduced to 30% of the originally calculated performance guarantee to ensure final completion.

Ms. Karen Ventura  
Glassworks – Ph 1A, 1B, 1C  
August 8, 2018  
Page 3

### ON-SITE BOND RELEASE RECOMMENDATION

The estimated remaining on-site improvement cost for Somerset Anchor, LLC has been calculated at **\$2,247,426.04** based on the attached estimated remaining improvement cost breakdown.

Accordingly, rather than release the entire performance guarantee at this time, we recommend that the same be reduced to 30% of the original bond or **\$2,517,580.35** in accordance with the attached estimated remaining site improvement cost breakdown of which 10% (**\$251,758.04**) should be retained as a cash guarantee OR 15% (**\$377,637.05**) as a performance bond until such time that the remaining improvements at the site have been completed, subject to approval by the Township Attorney.

Should you have any questions concerning this matter, please do not hesitate to contact this office.

Very truly yours

Anthony Abbonizio Jr., PE

Glassworks – Phases 1A,1B,1C  
Lots 1; Block 155**

**OUTSTANDING ITEMS**

Date: August 8, 2018  
Our File No.: PABP0155.02  
Page 1

**I. Sanitary Sewer**

1. Provide as-builts showing all mains with pipe material, pipe lengths, slopes and manholes with rim and invert.
2. Provide record drawings of pump station upgrades for both pump stations.
3. Aberdeen Utility Dept. to confirm proper operation of system. Letter of acceptance to be received.
4. SMH # 118 – Set casting above finished grade and seal the same, install non-inflatable plug in the invert out.
5. SMH #201 – Mortar pipe.
6. SMH #208 – Remove debris.
7. SMH # 209 – Remove debris and mortar casting.
8. Upgrades to both pump stations shall be accepted by the Aberdeen Utility Dept.
9. Provide certification by NJPE with as-builts confirming the slopes of the sanitary main are adequate and function as designed. Pipe runs that exceed the design slope shall be verified that scour will not happen and slopes that are less than the design slope shall be calculated to verify the design capacity of the pipe.

**II. Water System**

1. Provide as-builts showing all mains with pipe material and with triangulation to all line valves, hydrant valves, fire service and curb stop valves.
2. Township of Aberdeen Public Works to confirm proper operation of all valves, hydrants and curb stop boxes. Letter of acceptance to be received.
3. Cliffwood Ave. – 16" valve – remove stilt from valve box.
4. Water service vault – pump out water from vault, clean all piping, remove debris, locate 16" valve on outside of vault, remove lifting hooks from top slab, install pipe supports three (3) as per detail.
5. Ave B and Glassworks Boulevard reset valve box and hydrant, hydrant to be accessible from Glassworks Boulevard.
6. Avenue B 16" water main loop – all valves to be set plumb for proper operation, hydrants same, permanent valve markers to be installed.
7. Glassworks Boulevard between Building E/201 and Building F/203 locate and expose valve cluster.
8. Building 202 raise fire and domestic curb stops to grade.

9. Building 4 raise fire and domestic curb stops to grade.
10. Anchor way water main loop continuation – all valves to be set to grade, aligned and permanently marked, hydrants same.

**III. Storm Sewer System**

1. Provide as-builts showing all sewer mains with pipe material, pipe lengths, slopes and invert at all manholes/inlets with rim elevation and TC/Grate elevation of inlets.
2. Install 2' x 2' x 8" apron @ all roof drain cleanouts.
3. Entire Storm Sewer System to be jetted clean of all silt and debris.
4. MH (Manhole) #101 – Remove riser rings and set casting to grade, pour invert, integrity of CMP to be confirmed.
5. MH #102 – Align and mortar casting, mortar joints and remove debris.
6. MH #103 – Mortar casting and block course, remove top ladder rung, remove debris and pour invert.
7. MH #104 – Mortar pipes, remove debris and pour the invert.
8. MH #109 – Mortar casting.
9. MH #201 – Provide as-built additional tie-ins.
10. MH #203 – Remove "Aberdeen Sanitary" cover and replace with "Aberdeen Storm Sewer".
11. MH #204 – Seal pipe penetrations.
12. MH #209 – Remove debris and pour invert.
13. MH #231 – Remove debris.
14. MH #2 Existing – Uncover buried structure.
15. CB (Catch Basin) #101 – Mortar casting , trim HDPE pipe, mortar pipe penetration, install ladder rings, and remove debris.
16. CB #101A - Remove sediment controls for inspection.
17. CB #102 – Mortar casting and remove debris.
18. CB #103 – Remove debris and seal inlet.
19. CB #105 – Mortar Brick course, remove and reset ladder rungs, mortar pipes, remove debris and pour invert.
20. CB #106 – Mortar casting and block course and pipes, removed debris and pour inverts, "As-Built 12" D.I.P.
21. CB #107 - Mortar casting and pipe, remove debris.
22. CB # 108 – Mortar casting and pipe, remove debris.
23. CB #109 – Mortar casting and pipe, remove debris and pour invert.

24. CB #110 – Install addition ladder rungs.
25. CB #111 – Mortar casting, remove debris, and pour invert.
26. CB #112 – Seal top course of block and trim HDPE pipe.
27. CB #114 – Pour invert and remove debris and mortar casting.
28. CB #115 – Mortar casting, remove debris, pour invert, and provide as-built additional tie-ins.
29. CB #116 – Re-align ladder rungs.
30. CB #118 – Seal inlet, trim HDPE pipe, and reset curb piece.
31. CB #119 – Seal inlet.
32. CB #120 – Remove debris and pour invert.
33. CB #123 – Mortar pipe penetration.
34. CB #124 – Mortar casting, mortar pipe penetration, and remove debris.
35. CB #125 – Mortar brick course and casting, remove debris.
36. CB #126 – Mortar pipe penetration and seal inlet.
37. CB #127 – Reset curb piece, seal inlet, and install additional ladder rungs
38. CB #128 – Mortar casting and brick course, jack hammer asphalt to repair block course and remove debris.
39. CB #129 – Mortar casting, remove debris, and install ladder rungs.
40. CB #130 – Mortar under drain pipe and mortar casting.
41. CB #131 – Mortar casting, mortar pipe, pour invert, remove debris.
42. CB #132 – Mortar casting.
43. CB #133 – Mortar casting, pour invert.
44. CB #134 – Replace damaged ladder rung.
45. CB #200 – Seal inlet.
46. CB #202 – Remove sediment control for inspection.
47. CB #204 – Mortar casting, remove debris, pour invert.
48. CB #205 – Remove debris.
49. CB #206 – Seal Inlet
50. CB #207 – Seal inlet.
51. CB #210 – Remove sediment control for inspection.
52. CB #211 – Remove debris.
53. CB #212 – Pour invert.
54. CB #213 – Mortar casting, mortar pipe, remove debris, pour invert.
55. CB #216 – Mortar casting.
56. CB #218 - Remove debris.
57. CB #219 – Tighten bolts and mortar casting.

58. CB #304 – Remove debris.
59. CB #305 – Re-align curb piece and remove debris.
60. CB #307 – Remove debris and pour invert.
61. CB #321 – Seal pipe penetration, remove debris, and pour invert.
62. CB #323 – Mortar casting, remove debris, and pour invert.
63. CB #324 – Remove debris and pour invert.
64. CB #464 – Convert to Type B during Phase 2 construction, mortar casting and joints, remove debris and pour invert.
65. Existing storm sewer piping and drainage swales beyond the outfalls shall have an inspection report prepared by a Licensed NJPE as per instructions on the note found on the Master Drainage Plan sheet 31 of 79, CG101, 0200. Maintenance of the drainage swale shall be completed.

**IV. Concrete Work/Miscellaneous**

1. All curb, sidewalk and apron has been walked and marked in the presence of the Site Manager, Contractor and Engineer's Representative, pieces to be removed/replaced and or repaired as marked. Any additional concrete not identified as damaged as a result of repair attempts or damaged during further construction, i.e. paving, are to be addressed. An additional walk through will be required.
2. Provide Letter of Certification from the Design Engineer as to the compliance of all ADA Curb Ramps with the plan dimensions.
3. Remove and replace all sidewalk damaged during installation of gas utility trenching.
4. Building 221 – remove and replace back-pitched stairway landing.
5. Provide O&M Manual for chimney stacks including providing the responsible entity that will be performing the maintenance of the stacks.
6. Install buffer fencing along railroad tracks.

**V. Landscaping**

**Phase 1A**

1. It appears the wrong species was installed located along Glassworks Boulevard, in front of the deed restricted lawn area. These trees are part of a grouping of six (6) PXAB (London

Planetree) in the open space between Building #116 and #200. Remove and replace two (2) linden trees with approved two (2) PXAB.

2. Remove and replace one (1) dead PXAB (London Planetree) located in front of Building #224.
3. Remove and replace two (2) dead/dying CC (Redbud) and prune dead wood from four (4) CC within a grouping of 6 CC located in the parking lot median, across from Building #224.
4. Prune dead wood/form central leaders for five (5) SG (Sweetgum) and remove and replace one (1) dead SG within a grouping of 21 SG located across from Building #401.
5. Prune dead wood from one (1) PXAB (London Planetree) located in front of Building #402.
6. Remove and replace one (1) dead AU (Bearberry) and provide two (2) missing AU within a grouping of 12 AU and provide seven (7) missing PLM (Cherry Laurel) within a grouping of 7 PLM located just north of the dumpster at the southeastern corner of the site, to service Building #404.
7. Remove and replace one (1) dead PLM (Cherry Laurel) within a grouping of 6 PLM and provide four (4) missing CVM (Coreopsis) within a grouping of 26 CVM located in the eastern most parking lot island along the southern row of the parking lot, near the natural area and fitness path. Also, remove and replace one (1) unacceptable AR (Red Maple) with poor form located near this island.
8. Provide two (2) missing SN (Indian Grass) within a grouping of 7 SN, provide one (1) missing JHY (Andorra Juniper) within a grouping of 9 JHY and provide twenty (20) missing CVM (Coreopsis) within a grouping of 26 CVM located in the western most parking lot island along the southern row of the parking lot, near the natural area and fitness path. Also, prune one (1) AR (Red Maple) and one (1) QR (Red Oak) to form a central leader located near this island.
9. Provide four (4) missing SSAJ (Sedum) within a grouping of 19 SSAJ, remove and replace one (1) dying AU (Bearberry) and provide one (1) missing AU within a grouping of 14 AU, remove and replace two (2) dead IGC (Inkberry) within a grouping of 13 IGC, prune dead wood from a grouping of three (3) CC (Redbud), remove and replace one (1) dead KA (Cherry Laurel) within a grouping of 10 KA, remove and replace one (1) dead IGC (Inkberry) within a grouping of 13

IGC and provide six (6) SSCO (Little Bunny Fountain Grass) at the end of the row to fill in the open area, all located in the southern parking lot row between the two (2) trash enclosures, to service Buildings #402 and #400.

10. The parking lot island along the south side of Building #400 has construction larger than the plans depict and require additional plants to fill the area in. Remove and replace three (3) dead AU (Bearberry) within a grouping of 18 AU and provide five (5) CVM (Coreopsis), five (5) SSCO (Little Bunny Fountain Grass), five (5) JHY (Andorra Juniper) and eight (8) EP (Coneflower).
11. Remove and replace three (3) dead CC (Redbud) and prune dead wood from one (1) CC located along the southern side of Buildings #400 and #402.
12. Provide two (2) missing SSAJ (Sedum) located at the parking lot island just south and between Buildings #400 and #402.
13. Remove and replace one (1) dead TA (Littleleaf Linden) and remove and replace two (2) dead PLM (Cherry Laurel) within a grouping of 5 PLM located in the parking lot island just south of Building #402.
14. Straighten one (1) leaning TA (Littleleaf Linden), remove and replace one (1) dying PLM and provide one (1) missing PLM within a grouping of 5 PLM and provide two (2) missing SN (Indian Grass) within a grouping of 16 SN located in the parking lot island just south and between Buildings #402 and #404.
15. Remove and replace one (1) dying KA (Cherry Laurel) within a grouping of 7 KA, remove and replace two (2) damage SSAJ (Sedum) and provide one (1) missing SSAJ within a grouping of 13 SSAJ, remove and replace one (1) dead IGC (Inkberry) within a grouping of 11 IGC, remove and replace one (1) dead SSCO (Little Bluestem) within a grouping of 10 SSCO, remove and replace two (2) dead TA (Littleleaf Linden), straighten one (1) leaning TA (Littleleaf Linden), remove and replace four (4) dead IGC (Inkberry) and provide four (4) missing IGC within a grouping of 15 IGC, remove and replace two (2) dead KA (Cherry Laurel) within a grouping of 4 KA and remove and replace one (1) dead TA (Littleleaf Linden) all located from west to east along the central parking lot island, south of Buildings #402 and #404.

16. Remove and replace one (1) dead TA (Littleleaf Linden), remove and replace one (1) dead JHY (Andorra Juniper) within a grouping of 6 JHY, remove and replace one (1) dead PLM (Cherry Laurel) within a grouping of 6 PLM and provide four (4) missing EP (Coneflower) within a grouping of 8 EP located in the parking lot island just south of Building #404.
17. Provide a total of 27 SSCO (Little Bunny Fountain Grass) within a grouping of 27 SSCO in each of the three (3) parking lot islands along the western end of the parking lot along the railroad. The islands are engulfed in tall weeds and it is unclear how many SSCO survived in these islands.
18. Remove and replace one (1) dead TA (Littleleaf Linden) and provide all missing ground covers and grasses from the parking lot island with the trash enclosure located near the north end of the west side of the parking lot along the railroad. The island is engulfed in tall weeds and it is unclear what has survived in these islands.
19. Remove and replace two (2) dying JV (Red Cedar) within a grouping of 19 JV and remove and replace seven (7) JVES (Emerald Sentinel Red Cedar) within a grouping of 10 JVES located near the north end of the west side of the parking lot along the railroad.
20. Remove and replace one (1) dead TA (Littleleaf Linden) and provide all missing AU (Bearberry) within a grouping of 25 AU located in the parking lot island at the north end of the row of the west side of the parking lot along the railroad. The island is engulfed in tall weeds and it is unclear what has survived.
21. Remove and replace three (3) dead AU (Bearberry) and remove and replace two (2) dead TA (Littleleaf Linden) located along the southern side of Building #200.
22. Remove and replace one (1) dead TA (Littleleaf Linden), provide seven (7) missing SPHE (Prairie Dropseed) within a grouping of 25 SPHE, remove and replace two (2) dead CC (Redbud) within a grouping of 2 CC, provide six (6) missing AU (Bearberry) within a grouping of 20 AU, provide twenty-six (26) missing SSCO (Little Bunny Fountain Grass) within a grouping of 26 SSCO and provide twelve (12) missing SPHE (Prairie Dropseed) within a grouping of 12 SPHE located at the north end of the central parking lot island across from Building #202.

29. Remove and replace twelve (12) dying AU (Bearberry) within a grouping of 44 AU and provide nineteen (19) missing SPHE (Prairie Dropseed) within a grouping of 19 SPHE located at the southern corner of the parking lot entrance between Buildings #221 and #223.
30. Provide fifteen (15) missing SSCO (Little Bunny Fountain Grass) within a grouping of 15 SSCO, provide three (3) missing CS (Red Osier Dogwood) within a grouping of 3 CS and provide six (6) missing AU (Bearberry) within a grouping of 6 AU located in the parking lot island north of Building #223.
31. Provide five (5) missing AU (Bearberry) within a grouping of 14 AU located in the parking lot island centrally located between the north side of Buildings #223 and #401.

**Phase 1B**

32. Remove and replace four (4) dead GBPS (Ginkgo) within a grouping of 20 GBPS and prune dead wood from one (1) NS (Black Gum) within a grouping of 4 NS located at the southern end of the open space lot, near the parking lot that services the north side of Building #200.
33. Remove and replace one (1) dead AR (Red Maple) within a grouping of 4 AR located east of the playground, near the railroad tracks.
34. Remove and replace one (1) unacceptable NS (Black Gum) with major trunk damage within a grouping of 5 NS located along the parking lot that services the pool area, at the north end of the open space lot.
35. Provide eight (8) missing SSCO (Little Bunny Fountain Grass) within a grouping of 18 SSCO and remove the pile of mulch located within the central parking lot island along the south side of the pool.
36. Provide eighteen (18) missing SPHE (Prairie Dropseed) within a grouping of 18 SPHE and provide missing lawn from the parking lot island at the southeastern corner of the pool.
37. Remove and replace one (1) dead TA (Littleleaf Linden) and remove and replace one (1) dead AU (Bearberry) within a grouping of 14 AU located in the parking lot island along the east side of the pool house.

Page 10

38. Remove and replace three (3) dead AU (Bearberry) within a grouping of 23 AU located at the northeastern corner of Building #116.
39. Provide three (3) missing CEA (New Jersey Tea) within a grouping of 3 CEA, remove and replace two (2) dying AU (Bearberry) within a grouping of 22 AU, provide four (4) missing CEA (New Jersey Tea) within a grouping of 4 CEA and remove and replace one (1) dying AU (Bearberry) within a grouping of 24 AU located in the central parking lot island, east of Houses #114-#102.
40. Remove and replace two (2) dying AU (Bearberry) within a grouping of 9 AU located in the parking lot island east of House #102.
41. Provide one (1) missing TA (Littleleaf Linden), twenty-one (21) SPHE (Prairie Dropseed) within a grouping of 21 SPHE and seven (7) CS (Red Osier Dogwood) within a grouping of 7 CS located in the parking lot island east of House #114. Previously a construction trailer was located here and it appears the landscaping was skipped here.
42. Remove and replace four (4) dead TA (Littleleaf Linden) within a grouping of 4 TA, provide two (2) missing EP (Coneflower) within a grouping of 9 EP and ensure all other groundcovers and grasses have been installed as the island is engulfed in weeds and it cannot be determined what has survived located in the large central parking lot island, west of House #125.
43. It should be noted an existing oak tree has dead limbs that hang over the parking lot stalls in the lot at the northwestern corner of the site, behind House #121.
44. Remove and replace two (2) dead TA (Littleleaf Linden) located in the parking lot islands directly west of House #123 and #121.
45. Provide five (5) missing RFG (Black Eyed Susan) within a grouping of 15 RFG located in the parking lot island at the southwestern corner of House #115.
46. Remove and replace one (1) dead TA (Littleleaf Linden) located at the southeastern corner of House #115.

Page 11

47. Remove and replace three (3) dying VRC (Leatherleaf Viburnum) within a grouping of 6 VRC located along the west property line, across from House #111.
48. Remove and replace one (1) dead TA (Littleleaf Linden) located at the northeastern corner of House #105.

**Phase 1C**

49. Remove and replace five (5) dying JV (Eastern Red Cedar) within a grouping of 11 JV located at the southern end of the evergreen railroad buffer, along the eastern property line. Our office recommends replacement trees to be laid out in a more staggered line, as the plan depicts.
50. Provide thirteen (13) missing SPHE (Prairie Dropseed) within a grouping of 13 SPHE and remove and replace one (1) dying TA (Littleleaf Linden) located at the southeastern corner of the parking lot, in line with the northeastern corner of Building #224, at the north end of the phase.
51. Remove and replace one (1) dying PLM (Cherry Laurel) within a grouping of 10 PLM and remove and replace one (1) dead AU (Bearberry) and provide three (3) missing AU within a grouping of 18 AU located in the parking lot island across from the northeastern corner of Building #404, near the walking path.
52. Remove and replace fifteen (15) dead SSCO (Little Bunny Fountain Grass) within a grouping of 25 SSCO and provide four (4) missing CVM (Coreopsis) within a grouping of 20 CVM located in the parking lot island at the southeastern corner of Building #404.
53. Remove and replace one (1) dead QR (Red Oak) located at the southeastern corner of the property, near the exercise path.
54. Remove and replace two (2) dead TA (Littleleaf Linden) located along the southern side of Building #203.
55. Provide four (4) missing CFCC (Cherokee Chief Dogwood), provide three (3) missing CC (Redbud) within a grouping of 3 CC and provide two (2) missing IO (American Holly) located north of Building #203, along the walking path (to be constructed).

Page 12

**GENERAL COMMENTS**

56. The majority of the parking lot islands in all phases are engulfed in tall weeds making it difficult to determine landscape material condition and quantities. Weeds must be controlled to allow for the plant materials to establish and thrive.
57. All plant material shall receive a mulch saucer in accordance with the landscape details. The root flare of all trees MUST be visible. Currently, many trees have been installed too deep. This will not be acceptable.
58. It appears all KA (Sheep Laurel) have been substituted with cherry laurel. This should be discussed with our office.
59. Remove all trunk wrap, ribbons and burlap and roping on top of the root ball, to ensure plant vigor and health.
60. All plant material shall be checked and pruned of all dead wood and sprouts to increase plant health, vigor and aesthetic appearance. Remove all basal and trunk sprouts from all installed trees.
61. All replacement trees and shrubs shall be sized, staked and wrapped as per the as per the approved plan. Any plant substitutions shall be submitted in writing to the Township Engineer for approval prior to installation.
